Dear Mr. Radio:

The requirement for corrected drawings was sent with the Notice of Allowability and must be complied with. Failure to comply will result in abandonment of the application.

According to the 948, the drawings have multiple problems not just the problem with Figure 3. All of these problems need to be addressed and corrected drawings submitted by the due date.

Regards,

Nhan Tang

Dear Mr. Tang:

As you requested, attached is a PDF of the set of drawings currently on file in this patent application.

We need a reading from the USPTO as soon as possible as to whether the USPTO is going to force us to renumber the drawings (and make concomitant changes to the specification) just because there is no Figure 3. The specification makes it clear that there is no Figure 3. The drawings are consecutively numbered, as required by the Rules. One of the definitions of "consecutive" in my Webster's New Collegiate Dictionary (copyright 1950) is "succeeding one another in a regular order, series, or sequence". The drawings currently on file satisfy that criterion.
